About GBTEC Software AG

GBTEC Software AG is a specialist for business process management, digital transformation, business intelligence and integrated risk management. The company successfully combines consulting and software development under one roof. With BIC Platform, a suite for the digitalization in companies, GBTEC offers an innovative, holistic, powerful software for process and IT-system optimization. Its customers include organizations from different sectors, such as companies listed on the DAX, larger medium-sized enterprises as well as public authorities. Further information: <https://www.gbtec.com>.

About Process Mining Initiative (PMI)

Process Mining Initiative is a consultant group that specializes in process mining and BPM. They provide a variety of professional services for process mining and BPM-related initiatives and projects, from analysis of the as-is situation to problem identification, planning and implementation of improvement measures, along with the introduction of the latest IT technologies that support an organization in implementing business process improvement and digital transformation.

In addition, in order to raise awareness and understanding of process mining and BPM in Japan, as well as to promote their appropriate use, they disseminate useful information through the PMI website and various media. Jun Matsuo, the president of the company, is the first Japanese to write and publish books on process mining. Further information:
