

AID OPS: Driving seamless Process Orchestration

GBTEC Software S.L. has been granted financial aid from the Centre for the Development of Industrial Technology (CDTI) for its Research and Development project titled “AID OPS: ADVANCED INTEGRATIONS TO DRIVE ORCHESTRATION OF PROCESSES SEAMLESSLY”. This aid is co-funded by the European Union through the European Regional Development Fund (ERDF).

The AID OPS project aims to develop a no-code platform that enables citizen developers to design and deploy business solutions in medium and large organizations. The platform will integrate orchestration tools, robotic process automation (RPA), advanced integrations, and data analytics, all assisted by artificial intelligence.

Project Details:

- Location: Galicia, Spain
- Execution Period: 2023-2025
- Total Budget: €1,073,697.00

Expected Impact: With the implementation of AID OPS, companies are expected to optimize their internal processes, reduce operational costs, and improve efficiency in managing their operations. The platform will facilitate the adoption of advanced technologies without the need for deep programming knowledge, empowering employees to actively contribute to the digital transformation of their organizations.

About CDTI and ERDF: The CDTI is a public business entity under the Spanish Ministry of Science and Innovation, whose mission is to promote innovation and technological development in Spanish companies. Through
