Bochum, 03 November 2026 – GBTEC, a SaaS provider whose platform brings together business process management, enterprise architecture, process automation, and governance, risk, and compliance, has been positioned as a Challenger in the 2026 Gartner Magic Quadrant for Enterprise Architecture Tools.

Enterprise architecture decisions cannot be made in isolation. Changes to applications and technologies also affect processes, business capabilities, risks and compliance requirements. A central data foundation makes these relationships visible and gives AI the context it needs to support organisations in reshaping the way they work. From GBTEC's perspective, this year's Magic Quadrant positioning confirms the relevance of this approach, which the company continues to develop.

GBTEC Enterprise Architecture is part of the GBTEC Platform, formerly known as the BIC Platform. It enables organisations to document business capabilities, applications, and other architecture elements in a central catalogue and link them with process information. Context diagrams and dashboards give business and IT stakeholders a clear overview of the IT landscape, while an optional AI module with unmetered usage supports analysis and documentation.

The 2026 Gartner Magic Quadrant for Enterprise Architecture Tools evaluates vendors on their Ability to Execute and Completeness of Vision. On this basis, each vendor is placed in one of four quadrants: Leaders, Challengers, Visionaries, or Niche Players. The full report is available for download on GBTEC's website: GBTEC named a Challenger in the 2026 Gartner Magic Quadrant for Enterprise Architecture Tools
